APPROVED HYGIENE CONTRACTOR PROGRAMME

# APPROVED HYGIENE CONTRACTOR PROGRAMME

# APPROVED HYGIENE CONTRACTOR PROGRAMME

## Introduction

The Approved Hygiene Contractor (AHC) Programme has been developed to provide clients with a network of recommended contractors, to ensure that projects using Liquid Plastics' Hygiene products are applied to the highest of standards. We insist on members having in depth knowledge and experience in the application of our Hygiene coatings.

## Key Benefits

### Peace of Mind

An AHC member has at least two years minimum trading history with Liquid Plastics and has been independently audited

### Added Security

All AHC members are independently credit checked to ensure financial stability

### Quality Application

AHC members receive dedicated training on a regular basis

## Training

Companies that are AHC members, must ensure all operatives complete product training at Preston as part of the terms and conditions of their membership to the programme. The initial training is then refreshed every two years.

### Our comprehensive programme includes:

- Dedicated up to the minute Liquid Plastics training
- Professional and practical training modules

### Our training is backed by excellent in-house facilities:

- State of the art training centre at our head office in Preston
- Conference suites, training booths, and dedicated staff

### AHC operatives receive:

- Compulsory biennial AHC refresher training
- A training ID card
- AHC specific training certificate

# APPROVED HYGIENE CONTRACTOR PROGRAMME

## Independent Audit

An integral part of the AHC programme is the independent audits carried out by a member of the Institute of Clerk of Works. All potential new members must undergo an audit as part of the application process. This stage ensures that only credible contractors join the programme and are recommended by a neutral body. As part of the AHC membership all contractors also have to agree to a biennial audit of their office and working practices.

## Product Guarantee

Liquid Plastics' Hygiene coatings remain effective against the growth of micro-organisms throughout the life of the coating, and will not leach out when subject to intensive cleaning. We guarantee our product effectiveness for 10 years but typical life expectancies, when applied correctly, to specification, by a trained operative, are between 10 and 15 years - more than three times longer than traditional paints.

## Technical Support

In order to assist building owners and specifiers in the selection of the most appropriate systems for any project, we offer free technical and site support, and detailed written specifications

With a dedicated Hygiene Sales Manager, Technical Customer Service Department, and Technical Field Services Team located across the country, Liquid Plastics guarantees prompt and efficient project support.

## UK Wide Network

AHC members are based throughout the UK, ensuring quality workmanship on both a local and national scale. For further details of your nearest Approved Hygiene Contractor please call: **01772 255022**. Alternatively email [info@liquidplastics.co.uk](mailto:info@liquidplastics.co.uk)
